J. Wagner omnes Sculpsit

Jacquin del.

The flyleaf of this book was repaired with Japanese paper and wheat starch paste. New headbands were sewn and the book was rebound in archival calfskin. The leather was decorated in a similar manner to the original and new labels were applied. The leather was treated with potassium lactate and dressed with neatsfoot oil and lanolin mixture. The original boards and labels were boxed together with the book.
Richard C. Baker, Conservator.
